NastichLaw.com

Summer L. Nastich is a litigator, counselor, scientist, engineer, and arbitrator specializing in environmental, construction, and land use law, including any necessary litigation. Summer has a life-long passion for learning and problem solving. She received three undergraduate degrees (Oceanography, Biology, and Zoology), a then a J.D. cum laude, and then Master's degree in Environmental Engineering. Although at this point she clearly needed to stop going to school and go get a job, her thirst for gaining and applying knowledge never ebbed. And it led her to an exciting law practice that incorporates all of her book learning, the knowledge she gained working as an environmental consultant, and the knowledge and experience she's assimilated over more than a decade of practicing law. Now Summer brings all of this knowledge and experience to bear to solve her clients' challenges.

Summer speaks Legalese, Geek, Science, Construction, and Normal Person. Her interactions with technicians, experts, courts, clients, and adversaries are seamless, as she literally speaks all of their languages. Her education and experience also allow her to quickly synthesize technical issues and analyze data and information to unearth solutions to meet each client's unique needs.

When she's not working, Summer reads voraciously, takes wilderness survival classes, lifts and carries heavy stuff, trains in self-defense, goes mushroom hunting (don't worry, she goes with experts, though she's happy to pass along what she knows about why it's actually really hard to hurt yourself with mushrooms), eats too much, pranks her kids, and listens to podcasts while wandering through the woods. Summer revels in life and will always push herself to learn, improve, and grow.
